*Assessing Listening for Chinese English Learners* Pan Zhixin 2016-12-08 This book reports in detail the newly developed Communicative Listening Comprehension Test (CLCT) for the National College English Test (CET) of China. Following the principles of communicative testing in general and test construction approach proposed by Bachman and Palmer (1996) in particular, the project develops CLCT for CET-4 and CET-6. The research begins with the construction of frameworks of listening task characteristics and communicative listening ability. Subsequently, based on a survey of Chinese college students' English listening needs and an analysis of listening tasks in influential English listening course books and public tests, CLCT-4 and CLCT-6 test specifications are developed. Finally, sample papers are produced and a series of posteriori studies are conducted to examine the difficulty and usefulness of the newly developed notes-completion task type in two CLCT tests. As an example of successful integration of communicative testing theories and test construction practice, this research provides valuable insights into listening test development for other large-scale tests.

Intermediate Listening Comprehension Patricia Dunkel 1993 This intermediate text offers a rigorous, academically-focused listening program centered around a series of high-interest lectures. It is premised on the notion that second language learners must develop a much broader competency in listening comprehension than in speaking, since the listener has little or no control over the vocabulary, speech rate, or content used by the speaker.

Diagnosis and Correction in Reading Instruction Dorothy Rubin 2002 This great introduction to diagnosing and correcting reading problems has been revised and updated based on the latest tests and research. Using numerous examples and scenarios to illustrate concepts and techniques, this book is based on the premise that if diagnosis and correction are practiced as an integral part of daily reading instruction, there will be much less need for remediation. For pre-service and inservice educators, especially at the elementary school level.

Preventing Reading Difficulties in Young Children National Research Council 1998-07-22 While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive, technology-driven society. This
book explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn to read. Implications for parents, teachers, schools, communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, Preventing Reading Difficulties in Young Children examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading.

A Course for Teaching English Learners  Lynne T. Díaz-Rico 2008 A Course for Teaching English Learners (CTEL Handbook) offers strategies to equip teachers to work with English language learners, balancing fundamental principles with practical classroom techniques. This book offers in a single volume a wealth of background principles underlying the cultural, linguistic, and sociocultural contexts and foundations of learning and by providing a comprehensive framework that doesn't only focus on reading and writing. Provisions in the federal No Child Left Behind Act (NCLB) call for yearly accountability in English language growth for language-minority students. The CTEL Handbook addresses the new focus on testing procedures, as well as adaptation for English learners during the test-taking process. Throughout, Lynne Diaz-Rico provides the necessary background knowledge needed to educate English learners and also includes a variety of classroom methods for English language development in listening, speaking, reading, writing, and computer-assisted instruction. --From publisher's description.

Approaches to Learning, Testing and Researching L2 Vocabulary  Stuart Webb 2020-08-06 This volume brings together a collection of chapters focused on the learning, testing, and researching of L2 vocabulary by leading international researchers including Paul Nation, Batia Laufer, Frank Boers, Elke Peters, Ana Pellicer-Sánchez, Anna Siyanova-Chanturia, and Stuart Webb. Questions that are examined include: Is it useful to read a book to learn vocabulary? Which types of input encountered outside of the classroom contribute most to vocabulary knowledge? What are the most useful words to learn to understand the academic spoken language in mathematics, biology, and engineering lectures? Does writing words contribute to vocabulary learning? What should a test measuring the skill of guessing from context consist of? Should loan words be included in vocabulary tests? How should we evaluate vocabulary learning that occurs through watching captioned video? How has eye-tracking been used in vocabulary research? Together, the chapters in this volume highlight innovation in vocabulary studies and many directions for researching, testing, and learning words.
